**Motherboard CMOS Battery CR2032 -
Statement regarding regulations UL2054 and IEC62133-2**

UL2054:

These requirements cover portable primary (nonrechargeable) and secondary (rechargeable) batteries *for use as power sources in products*. These batteries consist of either a single electrochemical cell or two or more cells connected in series, parallel, or both, that convert chemical energy into electrical energy by chemical reaction.

IEC62133-2

Secondary cells (rechargeable) and batteries containing alkaline or other non-acid electrolytes - Safety requirements for portable sealed secondary cells, and for batteries made from them, *for use in portable applications*.

Based on the usage scenarios for the Kontron motherboards, the typically used CMOS battery CR2032 is not affected by above mentioned regulations.

Best regards,
Product Center Motherboards
